

Towel Bar Installation

Step 1: Install the Mounting Brackets **LEVEL** using the provided Screws and Anchors. Measure the center to center of your towel bar assembly and install the Brackets at the same distance. See **FIG 1**

Note: It is important to install the Mounting Brackets Level for the Towel Bar to be Level.

Step 2: Install the Flanges and Straps using the Top Screws and threading them into the Mounting Brackets. See **FIG 2**

Step 3: Install the Post threading the Back Caps into the Post. Make sure to align the Pins into the notches on both Straps. **Note:** You may have to keep the Top Screw loose on one side of the assembly enable to get the Towel Bar post into position and have the Pins rest inside the notches. Tighten the Top Screw once the Post is in position. See **FIG 3**
